

A SPECIAL INVITATION

National General Aviation Security Road Show

Presented by Navigance Technologies Group

Houston Hobby Airport

Million Air Houston

Thursday, December 15, 2005 (9 am to 2 pm)

Are you aware of the security solutions for General Aviation? Those who have attended the educational GA Security Road Shows have remarked that the Navigance *SAFE* system is an all-encompassing answer to meet the total security needs for airports, FBOs, corporate operators and airport tenants

Navigance and its strategic partners welcome you to drop by and see security solutions in action, not just simply talk about them. That's why you're invited to experience a hands-on demonstration of the only security solutions designed specifically for General Aviation facilities highlighting the *SAFE*[™] Security Blueprint.

You'll be able to board our partner *Pelco's* 42-ft. *Mobile Product Showcase* and get a hands-on demonstration and an in-depth educational presentation of the newest generation of digital cameras and Digital Video Recorders. Learn the latest technological advances in access control and ID badging, along with high-speed wireless solutions and their value to your airport and its tenants. And, see how Navigance has integrated its manageable, web-based and wireless network for system monitoring to simultaneously view real-time video at multiple locations.

Please RSVP to gail@navigance.com if you would like to attend. We look forward to showing you the latest in GA security systems and how you can enhance your operations safety and mitigate risk.
